

# Public Safety - Fire

## In the Line of Flames

### Audio Accessories with Flexibility

The **Commport Integrated Ear Microphone / Receiver System** is a tool created for such situations. A complete handsomer solution, it combines a miniature microphone and receiver, employing digital processing technology to ensure superior audio quality and clarity, even with high noise backgrounds.

It is available in different configurations, such as **radio PTT adapter**, **Ring PTT** or **Palm PTT**, and is suitable for use with any type of protective clothing, even gloves. The Commport system's robust construction makes it a versatile communications tool for fire and rescue forces.

### Ready Power at all time

To ensure your radios are always primed and ready for service. Without impinging on traveling time, they can be charged via a **Mobile Vehicle Adapter** or **Travel Charger**. The **Mobile Vehicle Adapter** virtually turns a portable radio into a mobile, complete with capabilities to extend coverage, in-vehicle programming and handsfree capability. The **Travel Charger** charges your battery on the go and also offers handsfree accessibility, allowing you to concentrate on the road.

Larger buildings and factories, increasingly powerful and flammable chemicals, complicated heavy machinery...the evolution of man-kind towards industrial society has led to a whole new set of challenges for teams specializing in fire control, as well as search and rescue.

Teamwork at the disaster scene is imperative, where lives are literally at stake. This requires specialized heavy-duty radios and accessories that are rugged and yet able to work in all-weather conditions. There are other challenges beyond fires and falling beams, poisonous chemicals, gases and plastics where adequate protective gear and breathing apparatus would need to be worn.

Motorola has a host of two-way radio accessories specially designed to suit every situation to provide a hardy and reliable communications link between fire-fighters and backup personnel in hostile fire and / or emergency environments.

## Enhance Your Radio's Capabilities

A comprehensive range of accessories is available so that the radios can be customised to suit your needs. Adding the proper headsets, microphones, batteries, chargers or carry cases can enhance the productivity of the people who use two-way radios. Motorola accessories are built with the highest quality standards and are specially engineered to assure maximum performance of your radio, no matter what profession you're in.

and Velcro secured  
Pocket

## Specialty Audio System

If there is a need to communicate in high background noise, Motorola's special **Helmet-Com system** can be fitted to any standard helmet. At the same time, it offers ultra-clear transmission, as the special bone conduction microphone is not dependent on sound waves for transmission, but rather converts the vibration pressure signals directly from the skull bone. The **Helmet-Com system** is connected to the **two-way radio** via a **fire-retardant PTT**, which is also splash proof (IP55) and intrinsically safe.

For search and rescue missions or normal day to day operations, the **Remote Speaker Microphone** is one device capable of both transmission and receiving of messages. When clipped near the shoulder, it enables quick and easy two-way communication, without removing the radio from the belt or carry case. The optional **Receive-Only Earpiece** is ideal for confidential listening.
