

Accessories and Batteries for the Commercial Portable Two-Way Radios

Motorola CP1660, CP1600, CP1300, CP477 and CP476

Enhanced functionality, reliable communication— for higher levels of productivity

The newest CP1660, CP1600, CP1300, CP477 and CP476 commercial portable radios deliver the quality features you need at a competitive price. A lightweight, compact design makes the radio comfortable and easy to carry, even when working long shifts. Tighter specifications that provide enhanced rejection of interference, ensure your message gets through clearly. Built-in simple voice scrambling provides increased privacy and helps ensure the message only goes to those users that need to hear it. These radios operate both with a repeater and in talkaround mode ensuring you are able to communicate whether you require wide area or on-site communications.

With its extensive feature set, ergonomic shape for comfortable use plus voice privacy in a durable, lightweight, compact design, you get just what it takes to enhance communication while increasing efficiency and productivity.

CP1600

CP1660

The CP1660, CP1600, CP1300, CP477 and CP476 portables offer a wide range of Motorola Original® audio, energy and carrying accessories to personalize a radio solution specific to your needs.

These radios also support Mag One™ audio accessories, which provide an affordable option for light duty radio users.

Manufacturing: In light manufacturing environments, users want to keep their ears unobstructed to hear ambient sounds and conversations. A lightweight temple transducer uses bone conduction technology to allow you to both hear the radio conversations along with the conversations nearby.

Hospitality: Whether coordinating staff for a conference or making a room change for a last-minute guest, communication needs are frequent and shifts can be long. The high-capacity Li-Ion battery ensures your battery meets your demanding communication requirements.

Construction: Construction workers often work in demanding environments. The Submersible (IP57) Remote Speaker Microphone allows a user to communicate quickly and easily, even when wearing gloves in these rugged environments.

Education: It is imperative that educators and administrators are able to communicate discreetly and that your hands are free to manage the tasks at hand. A lightweight headset helps make it comfortable and convenient to manage administration duties and contact colleagues discreetly.

Remote Speaker Microphones

Windporting Remote Speaker Microphones

The windporting feature dramatically lessens noise caused by high winds and other severe weather conditions. Audio can pass through the speaker grill even when the microphone port is blocked by water ensuring a user's confidence of clear communications.
