

## Fifteen Reasons to Use the **MOTOTRBO™ System**

1. MOTOTRBO TDMA Protocol meets ETSI DMR Tier-2 global standards.
2. TDMA Technology allows ONE MOTOTRBO repeater to provide TWO channels of communication.
3. Two channels per repeater means:
  - less RF equipment
  - reduced complexity
  - easier installation
4. TDMA technology provides for a 40% increase in battery life
5. IMPRES Accessories
6. Integrated GPS
7. Integrated text messaging
8. Integrated functionality
9. Operates using both analog and digital function
10. IP57 Immersible Portable Radios
11. Integrated enhanced privacy with multiple security codes
12. 100% continuous duty repeater
13. All data and call functions operate in talkaround or through a repeater
14. Application developer program
15. IP Site Connect allows repeaters to be linked through an IP network
